

## **Assessment Project Brief: Full stack developer**

As a full stack intern at Kudosware, you will have the opportunity to work on a variety of exciting projects and gain hands-on experience in the field of web development. To assess your skills and abilities, we would like you to complete the following project.

### **Project Overview:**

YourHR is a job search service that aims to help job seekers find the ideal job roles based on their qualifications and preferences.

Your task is to create a usable website for YourHR that allows job seekers to sign up and submit their resumes.

### **Project Requirements:**

- Develop a web application that allows job seekers to fill out a signup form with their personal information and upload their resume.
- Implement a backend that securely stores the user information and resumes in a database.
- Create a responsive website, you don't need to spend too much time on the UI design, just the basics.
- Have at least 2 pages in the website

### **Deliverables:**

- A functional web application that meets the requirements outlined above.
- Source code and documentation that clearly explains the architecture and functionality of the web application.

### **Submission:**

Please host the website on free hosting websites and submit the link along with the source code file and the example database file after you are done with the website.

All the best!

Team Kudosware.
